SHARES in gold producer Dominion Mining soared yesterday driven by a hefty production increase and spectacular drilling results.

March-quarter gold production from Dominion's Challenger mine in South Australia increased 46 per cent to 12,244oz from 8402oz in the December period as underground operations reached full capacity.

With the completion of the underground ramp-up, managing director Peter Alexander said Dominion was in a position to produce between 17,000oz and 18,000oz of gold in the June quarter. Drilling of some of the higher-grade lodes at Challenger returned some of the most spectacular gold intersections ever seen at the project, including 1.12m grading 1016g per tonne (g/t) gold, 9.3m at 78.4 g/t, and 2.25m at 162 g/t.
