## SIGNIFICANT GOLD INTERSECTIONS RETURNED FROM THE KUKERIN PROJECT

Significant gold intersections, including **21 metres grading 3.5 g/t gold**, have been returned from a programme of reconnaissance air core drilling at the **Bottleneck Prospect**, which lies within the **Kukerin Project** and forms part of the larger **South West Yilgarn** area.

Drilling at Kukerin has focused on the regional gold bearing Kukerin Shear Zone that has been mapped by recent regional airborne magnetics to extend in excess of 75km over the length of Dominion's 100% owned Kukerin and Nanicup Bridge Projects.

*Kukerin and Nanicup Bridge Projects*

Assay results for three quarters of the 134 hole programme have been received to date.

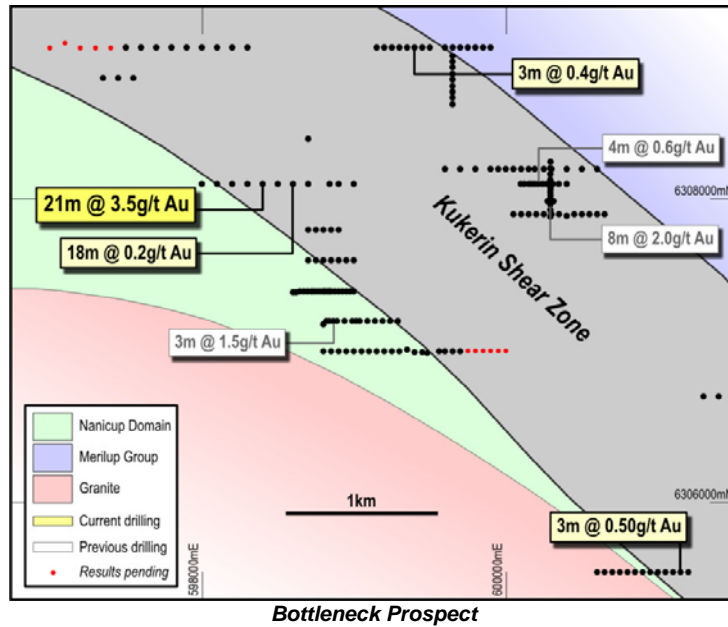

Significant results from 3 metre samples are tabulated below:

Hole ID	Coordinates (GDA94)	Dip/Azi	Interval (m)	Width (m)	Au (g/t)
08KUAC075	6308100N/598400E	-60 / 270	<b>24-45</b>	<b>21</b>	<b>3.5</b>
		<i>including</i>	<b>33-36</b>	<b>3</b>	<b>12.2</b>
08KUAC090	6305540N/601150E	-60 / 270	60-63	3	0.5
08KUAC032	6309000N/599400E	-60 / 270	36-39	3	0.4
08KUAC077	6308100N/598600E	-60 / 270	24-42	18	0.2

For personal use only

The bulk of the drilling programme comprised reconnaissance testing of the shear zone. The geometry of the mineralization is not known therefore no estimate can be made of true widths.

There is no drilling, along strike of the shear zone for 1,300 metres to the north west and 400 metres to the south east, of the intersection in hole 08KUAC075.

**Bottleneck Prospect**

A follow up drilling programme is being planned as soon as a suitable rig can be secured.

Also within the **South West Yilgarn** area, drilling programmes are about to commence to test a well defined geophysical (EM) target within an extensive zone of copper-gold mineralisation at the **Wongan Hills Project**, and to undertake further evaluation of the **Nanicup Bridge** gold system.
